## NANTES

Nantes benefits from a dynamic and diversified industrial fabric. At the forefront in the food industry and shipbuilding, it is also the third national aeronautics pole, a strategic site for timber and materials and a major tertiary and financial centre.

The most innovative sectors are also present with biotechnologies, health, ICT and composite materials.

These poles of excellence benefits also from the implantation in Nantes of a network of high level schools and booming research centres: 2200 research workers working in 200 laboratories contribute to make Pays de Loire the fourth French region for patent pending.

ESPACE LASER trade show will take place in Cité Internationale des Congrès which is located downtown, close to the TGV railway station. Stands will be installed in the main hall which is completely covered with wood and enjoys the daylight.

## ESPACE LASER

ESPACE LASER, the international trade show for materials and laser techniques in industry, will take place in Nantes on 19<sup>th</sup> and 20<sup>th</sup> May 2010.

ESPACE LASER is the unique event in France specifically dedicated to laser industrial processes. It is organized by IREPA LASER, in partnership with Air Liquide and Club Laser et Procédés.

Exhibitors are manufacturers and distributors, suppliers of laser systems, equipments, service suppliers (maintenance, training, process optimization), sub-contractors and technical centres.

ESPACE LASER focuses on laser technology that concerns a wide range of industrial sectors, from mechanics and micromechanics to plastics, electronics, packaging, health, food industry, prototyping...

## LIST OF PRODUCTS

**LASER SOURCES:** CO<sub>2</sub>, Nd-YAG, Fibre, Diodes, Excimer, ...

**PROCESSES:** cutting, marking, engraving, drilling, welding, soldering, cleaning, surface treatment, cladding ...

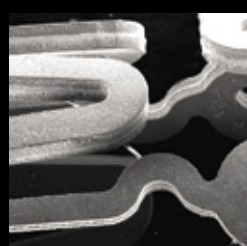

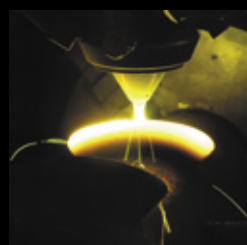

**PRODUCTION:** laser machines, machines of rapid prototyping, robots, direct-manufacturing machines

**COMPONENTS:** gas, optics, focussing heads, fume and dust extraction systems, coolers

**SERVICES:** studies, systems development, engineering, training, job-shop, safety

**DESIGN:** CAD software, 3D simulation

**CONTROL:** beam analyser, power measuring systems, seam tracking, dimensional control

### TERMS OF INVOICE AND PAYMENT

Invoice is sent one month before the opening date. Full payment at invoice receipt.

Your application becomes effective on the day of receipt of your order. It becomes definitive and irrevocable for the buyer. However the buyer can cancel his participation within a delay of 10 days. Any cancellation must be notified to the organizer by registered mail on March 31st 2010 at the latest. Beyond this delay, all payments already made will be kept by the organizer. In all cases subscription fees are kept by the organizer.

At reception of your application form we will send you following documents:

- An invoice
- A subscription form for the official catalogue
- The exhibitor's book including all practical information like hotel lists and provided services (furniture, electricity, Internet connections, badges, company name sign) and specific insurance conditions.
